

## QC MANAGER/LAB TECHNICIAN POSITION AVAILABLE AT KRONOTEX USA

Primary responsibilities include:

- QA and QC testing
- Process improvement projects
- Dealing with customer claims
- Lab management
- Lab database maintenance
- A limited amount of environmental responsibilities

They are planning to hire a QC Manager/Lab Technician. They prefer someone with a BS in wood products but will consider qualified others. Their current operation contains two melamine laminating presses and two milling lines with an annual capacity of >14,000,000 square meters. The final product is a "click together" flooring product sold at many stores such as Lowe's. The position's primary responsibilities would be:

- QC and QC testing
- Process improvement projects
- Dealing with customer claims
- Lab management
- Lab database maintenance
- A limited amount of environmental responsibilities

The opportunities for advancement are great as they are building a continuous HDF press at their facility with plans to build more melamine laminating presses and milling lines in the future.

Interested individuals should forward a copy of their resume by email or USPS mail.
